MONEYBALL USER GUIDE

Importing the file into a custom package:

1. Go to https://h02-d03.ucc.ovgu.de

2. Enter the login credentials.

3. Navigate to the SAP HANA Editor.

4.Import the application file into SAP HANA using the Import Archive feature of the SAP HANA editor.

- Right click on the package

- Select Import > Archive

6. Make sure that the necessary tables and calculation views are also imported into the same package.

- Right click on the package

- Select Import > file

7. Open index.html file and press run to run the MoneyBall application.

How to use the application :

Once the application is running, the users can freely navigate around the application by clicking on the different tabs.

Overview tab : Depicts the current weighted average and salaries for the players.

ABC Analysis and K-Means Analysis: Depict the graphs obtained after running the two different predictive analysis on the dataset.

ABC Dataset and K-Means Dataset: Lists the player data after the ABC and K-Means analysis respectively.

Batting Analysis, Pitching Analysis and Salary Analysis : Depict the graphs obtained from the descriptive analysis.
